

Opposition to Advancing Machine Learning Workflow Efficiency by Improving Management of Large Image Data Sets

Filip Kronström

May 18, 2021

Goals, problem formulation, and boundaries

Goals are clearly presented in Chapter 3, I think this should be done in the introduction. As the rest of the thesis, including the theory introduced in Chapter 2, should aim to fulfill these goals I think it is reasonable to see them before reading the theory chapter.

Regarding problem formulation it is partly introduced in a good way. The company and the issues with big, changing data sets etc. are introduced. However, I would want to see more information about the data. A rather substantial part of the thesis concerns
